**Re: Letter of Support for EverWind Fuels**

Dear Minister Parsons,

We, the Town of Lawn, have been in dialogue with EverWind Fuels LLC and its subsidiary companies (collectively, "EverWind") regarding their proposed green hydrogen and ammonia project on the Burin Peninsula, which we believe will bring substantial investment and associated economic benefits to our region.

We would like to express our support for the project and the consultative approach EverWind has taken to date.

We believe the working relationship that has been established prior to the Crown Lands Nomination Process for Wind Energy Projects on October 1<sup>st</sup> represents a positive approach for the residents and businesses of the Burin Peninsula. This allows us, as a region, to determine how this project will be developed and integrated into our communities in a responsible manner that respects our values and lifestyle.

EverWind's approach of early engagement and collaboration is a model for ensuring a project is backed by community support while delivering community benefits. EverWind is the only proponent that has spent time visiting the towns and communicating about the potential of the new green hydrogen industry in person.

We look forward to further work with EverWind and are excited about the potential for the region to harness our renewable wind resource for the environment and our region's future.

Yours very truly,

**TOWN OF LAWN**
